ROXX®

ROXX®

Join the ROXXNATION

We are **ROXX®**

The name ROXX® came easily.

Combined with the concentrated knowledge and many years of experience, our three founders, who have been leaving their mark in the event and lighting industry for many years already, came together in 2019 to start this oustanding venture.

Product development, sales and marketing as well as the exceptional know-how and the profound rooting in the field of the professional lighting technology belong to our core competences and therefore guarantee extremely innovative and reliable products, excellent support and professional service in every aspect.

Designed & developed in Germany

ROXX® products are developed and designed in Germany. Always in tight consultation with our customers and experts who will eventually be working with these tools. This ensures innovative, easy-to-use and performance-oriented solutions, which provide added value for our customers.

Made to last

Recommended for permanent outdoor use, some ROXX® products feature additional corrosion protection and enhanced IP66 equipment protection, thereby providing that crucial extra for a wider range of applications. In addition to architectural or theme park applications, even fixed installations in coastal or offshore areas with high salt exposure can be reliably implemented over long periods of time.

Wireless DMX

ROXX® integrates the latest Wireless DMX technology from Swedish manufacturer Lumenradio.

The CRMX transceiver module integrated in our fixture realises wireless DMX reception as well as a separate transmission option.

DMX / RDM

Via two IP65-certified 5-pole XLR sockets, the fixture can be integrated into a wired DMX line and furthermore uses via bi–directional RDM communication.

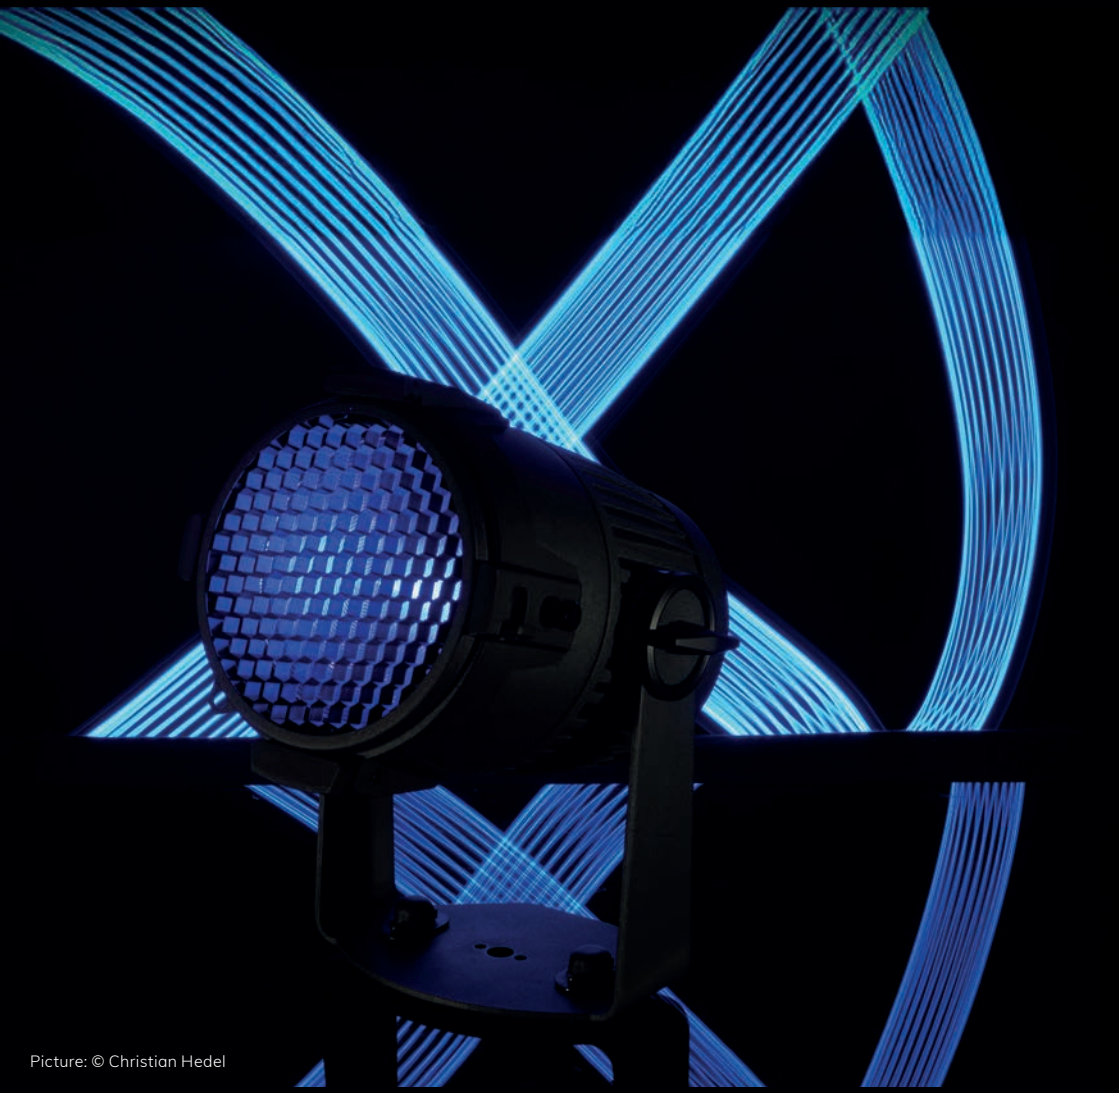
Smart control via ROXX.APP

The integrated Bluetooth interface enables direct control of the spotlights via ios device with ROXX.APP, without the need for additional hardware.

Quick and easy. The lens change

Thanks to the specially developed and patented ROXX® R.LOK® technology, the lenses can be changed easily, quickly and without any tools. This allows the beam angle to be conveniently adjusted. The 360° slot rotation also allows the elliptical lenses to be aligned continuously.

SHOW mini



Picture: © Christian Hedel

With the SHOW mini series, ROXX® continues to fulfill the demand for very high performance, weatherproof lighting fixtures for entertainment and architectural applications, in addition to a major new addition, a battery version. The flexibility and variety of options previously offered in terms of light quality, size and accessories is now even more pronounced, giving customers that special extra bit of freedom of choice.

SHOW mini

Size comparison
between SHOW & SHOW mini

ROXX® SHOW mini Series uses Single-Source-LED's that provide a very smooth, powerful light without color- or multi-shadows and with LED variations including a Tunable White (+Color) and a RGB+Lime version. Circular as well as elliptical lenses can be changed easily, quickly and without any tools thanks to the specially developed and protected ROXX® R.LOK technology. A barndoor and honeycomb are also available as accessories.

B.SHOW mini

Tracklight function available

Battery version

Say goodbye to cable chaos with the new standard battery fixture for ultimate flexible usage without compromise. The powerful lithium-ion battery offers incredible versatility with up to 24 hours of runtime while ensuring reliable operation by preventing overcharging and exhaustive discharge. The integrated CRMX receiver module offers the latest wireless technology from Lumenradio and the fixture is ROXX.APP ready.

FLEX Series

German Sustainability Award, 2022
B.FLEX, FLEX HAT

Picture: © Svertsøn Design

One central high power LED, in combination with twentyfour ultra-bright SMD LEDs create amazing, bi-color effects in wall-wash and deco-light applications.

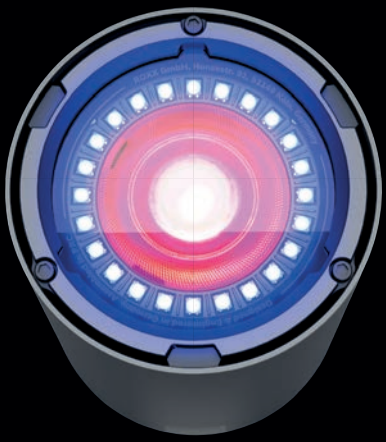
Battery Operated for 100% Flexibility

Long-life, powerful lithium-ion battery guarantees reliable operation up to 24 hours runtime and 100% flexibility on any event. The integrated Battery Management System prevents overcharging and exhaustive discharge. An additional charging setup protects the battery during longer storage and thus ensures a longer service life.

FLEX Series

ROXX® specially developed Dual-Bayonet-System

Due to our special designed dual-bayonet system all our one-size accessories like holographic filters, glare-shields or creative adaptors such as FLEX Light Tubes and HAT can be combined and fit tool-free to all FLEX models.



Halo EFX Engine

One central high power LED, in combination with twentyfour ultra-bright SMD LEDs create amazing, bi-color effects in wall-wash and deco-light application. Due to its single pixel control, ROXX® HALO EFX engine allows advanced and creative effect possibilities and a stunning eye-candy look. The versatile tool for wall-wash, bi-color and pixel effects. The individual LED´s can be controlled by any DMX source, or by using our internal preprogrammed Macro patterns and chasers.

Ingenious 2in1, fan-free cooling system for a clean and unique design

The specially designed Copper Heat pipe cooling system of the FLEX Series is a highly thermally conductive heat pipe with a special capillary structure and liquid inside. The liquid absorbs the heat generated by the LED, heats up and migrates in vapor form to the other end of the heat pipe, where it cools down again due to the low temperature prevailing there and thus condenses. This continuous cycle creates a kind of water cooling, which gives the FLEX Series a silent and at the same time very effective and efficient heat dissipation.

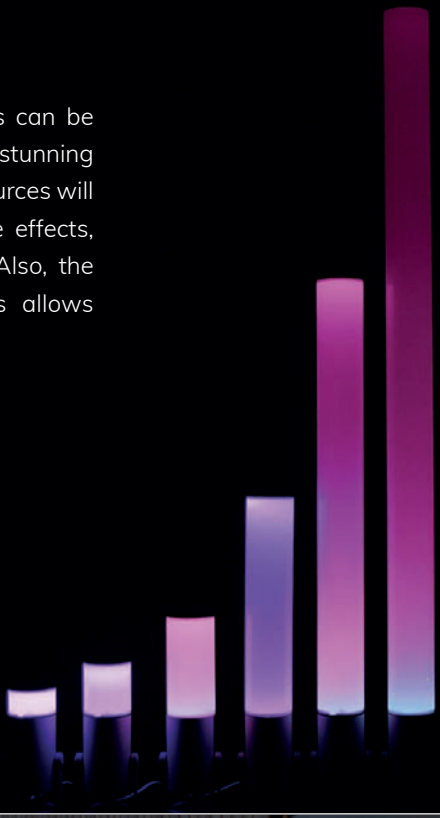
Diffusors

Thanks to the inner bayonet, filters can be changes easily, from native 3° to circular 5°, 10°, 20°, and elliptical 5°x20° or 5°x30°.

FLEX Series

Light Tubes

The 6 different sized, white light tubes can be attached to the FLEX series, creating stunning deco effects. Combining the two light sources will create spectacular fading colors or fire effects, due to the different radiation angles. Also, the combination of different tube lengths allows lighting designers a lot of creativity.



Picture: © Manfred H. Vogel

PRO AV AWARD, 2022
FLEX Serie, FLEX HAT

FLEX HAT

The perfect accessory for Gala dinner tables or glare free outdoor light applications. Due to it´s special designed reflector the lightthrowing diameter reaches around 2m, ideal for table illumination while showing a nice deco effect at the same time, due to the mix between reflections and shadings.

„The high-quality appearance of the „HAT“ allows me to use the luminaires in close proximity to the audience and therefore include the spectator even more closely in the action and let them become part of the light show.“

Flo Erdmann ,
Freelance lightdesigner

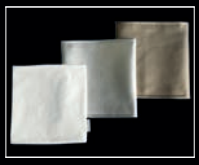
FLEX HAT

The perfect accessory for Gala dinner table or glare free outdoor light applications. Designed for tables with a diameter of 2 m.

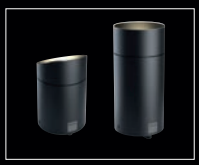


Hoodie

The hoodie turns every FLEX fixture into an individual design piece.

Yoke

Base for FLEX to be used as a tiltable floor stand or as an accessory for rigging, using a 13mm (½ inch) centric and oblong hole.

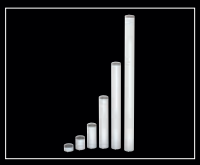


Anti-Glare Shield

Full-Anti-Glare-Shield and Half-Anti-Glare-Shield for precise control of the glare.

Diffusors

Thanks to the inner bayonet, filters can be changed easily, from native 3° to circular 5°, 10°, 20°, and elliptical 5°x20° or 5°x30°.



Tubes

Opal acrylic tubes in 6 different lengths for ambient two-tone effects, fire effect and so much more. The FLEX Tubes include a bayonet ring and a lid. FLEX tubes fit all FLEX models.

Base Extension

A base to be attached underneath FLEX when using cabled DMX for upright positioning.

Groundplate

Base used as counterweight for the longer tubes, includes leveling screws on all sides. An integrated spirit level serves for quick and convenient tilt adjustment.

Connectionplate

Due to its 3x 3/8“ female thread it allows for attaching multiple accessories such as FLEX Spike, universal microphone stands and bolts.

CLUSTER Series

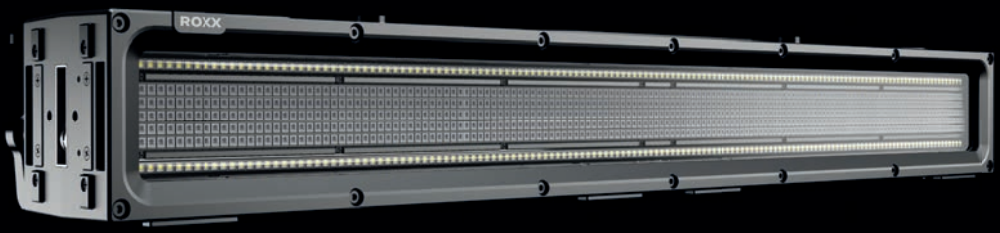
Scorpions, Rock Believer Tour
CLUSTER B4FC

Picture: © Manfred Nikitser

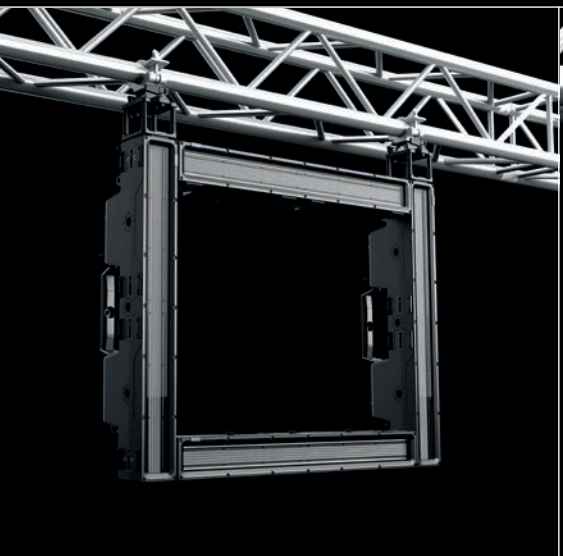
All CLUSTER products can be easily connected both horizontal and vertically, by using the integrated C-Lok system. The series is made to enable toolless multiple array configurations, scalable from a single vertical line, to massive matrix like arrays. All products are outdoor ready and protected from ingress of dust and rain, thanks to their IP65 rating. There are several mounting options – Camlock mounts on top and back enable the use of Omega-Brackets, Yokes can be attached to mounting points on all sides, or the internal C-Lok system can be used for seamless interconnection. Pre-Link Magnets on top and side help to allign the fixtures, giving an incredible user-friendly operation and save interlocking. A specially designed rigging bracket is used for seamless connection of multiple CLUSTER products, to avoid gaps due to bracing of the truss structure by variable, sliding mounting positions. Floor extensions can be used to create vertical structures in single or double rows.

CLUSTER S1

Featuring 720 RGB LEDs and 288 CW LEDs, the CLUSTER S1 delivers a massive output that captivates any audience. With 26 controllable segments on both RGB and individual strobe lines, you have unparalleled control over your lighting environment. Designed for convenience and performance, the S1 comes equipped with a plethora of features and allows you to choose from a vast library of built-in patterns for effortless creation of stunning effects.



- High-power, pixel-mappable hybrid strobe / wash
- Each 26x controllable segments on RGB and individual strobe lines
- 720 x RGB LED´s & 288 x CW LED´s creating massive output
- Continuous pixel pitch of all LED lines between the devices CLUSTER S1 and S2
- Large number of build-in patterns for fast and simple way of creating stunning effects
- IP65 rated for Indoor & Outdoor use
- Integrated C-Lok system for toolfree and seamless CLUSTER setups
- Pre-Link Magnets for easy aligning and “one-handed” operation
- Optional magnetic filters enable distinctive effects in every light show and camera application
- Multiple mounting locations for creative rigging options & floor mount
- 16-bit dimming control for smooth, perfect fades
- Adjustable PWM frequencies up to 25kHz guarantee flicker-free camera operation



CLUSTER S1

CLUSTER S2

All CLUSTER products can be easily interconnected both horizontally and vertically, by using the integrated C-Lok system. The series is made to enable toolless multiple array configurations, scalable from a single vertical line to massive matrix like arrays. The S2 is an advanced pixel mappable strobe and washlight that combines two complementary effects in one unit, designed for extremely powerful and versatile applications. Thanks to the advanced and tool-free cluster mechanism, the fixture can be combined with all CLUSTER series products to provide lighting designers with new creative possibilities in horizontal and vertical configurations and is suitable for small to large venues and stadiums.

CLUSTER S2 features a large number of build-in patterns, giving users a fast and simple way of creating stunning effects whenever a media server is not available, or the installation requires a speedy solution.

With our ROXX CLUSTER System and the equal spacing of the individual LED lines, continuous effects can be displayed across several units. In this way, the units merge into a large whole in both horizontal and vertical alignment. The 4 individual, thin strobe lines can also be used to display numbers, letters and graphics.

- High-power, pixel-mappable hybrid strobe / wash
- Center Strobe mimics traditional look from Xenon-bulb
- Full color mixing & tuneable white with high CRI
- Four extra single Strobe lines creating unique effects and giving extra boost on High-Power Strobe applications
- Large number of build-in patterns for fast and simple way of creating stunning effects
- IP65 rated for Indoor & Outdoor use
- Flexible Interlocking system for truss/ floor mount
- C-Lok for seamless CLUSTER setups
- Multiple mounting locations for creative rigging options

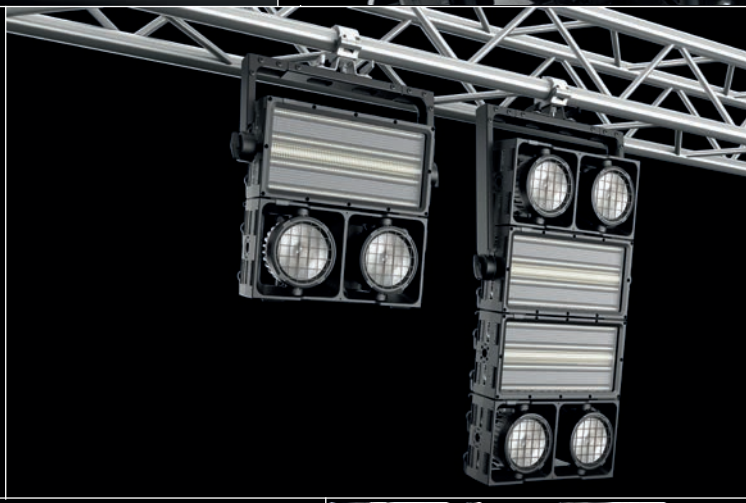
All CLUSTER products can be easily interconnected both horizontally and vertically, by using the integrated C-Lok system. The series is made to enable tool-free multiple array configurations, scalable from a single vertical line to massive matrix-like arrays.

Mounting Options

There are several mounting options – Camlock mounts on top and back enable the use of Omega-Brackets, Yokes can be attached to M12 mounting points on all sides, or the internal C-Lok system can be used for seamless interconnection. Pre-Link Magnets on the top and sides help to align the fixtures, giving ´hands free´ operation for secure interlocking.

Rigging Bracket

A specially designed rigging bracket is used for a seamless connection of multiple Blinders as well as to avoid gaps due to bracing of the truss structure by variable, sliding mounting positions.



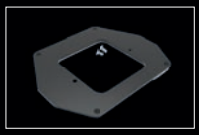
CLUSTER Yokes

CLUSTER Yoke 4.2 is included in the 4-Lite version of the CLUSTER Blinder. CLUSTER Yoke 4.1 is included in the 2-Lite version and CLUSTER S2.

CLUSTER Series / Accessories

CLUSTER Yoke 4.2, 4.3, 2.2

Is only placed on the luminaire when needed and otherwise is concealed in the case. Allows vertical rigging and floor mounting.



CLUSTER Floor Extension

With its integrated rubber feet it´s designed to ensure a secure stand on every plane surface with every possible angle / orientation of the fixtures head.

CLUSTER Omega Bracket

Tool-free and fast mounting via ¼ turn fasteners. Suitable for all Cluster models.

CLUSTER Rigging Bracket G2

Used for seamless connection of multiple CLUSTER units to avoid gaps due to bracing of the truss structure by variable, sliding mounting positions.

Floor Bracket

For horizontal use on the ground with the option of setting different angles.

Vertical Bracket

CLUSTER S1

For column application on the floor or as vertical suspension application.

CLUSTER Cases

Robust Touring Cases for CLUSTER Series.

FX Filter Elliptical Horizontal

CLUSTER S1, S2

The elliptical horizontal filter shapes the light beam horizontal with a frost effect.

FX Filter Elliptical Vertical

CLUSTER S1, S2

The elliptical vertical filter shapes the light beam vertical with a frost effect.

FX Filter Smoked Clear

CLUSTER S1, S2

The Smoked Clear Filter is especially useful in TV applications, as it allows the devices to visually disappear in the stage design when switched off.

FX Distance Frame

CLUSTER S1, S2

The distance frame delivers an even lightbox, soft pixel mapping, and a 3D effect, offering lighting designers creative options and stunning visuals. An integrated bolt allows the safety cable to loop through.

FX Filterframe Tube Opal

CLUSTER S1

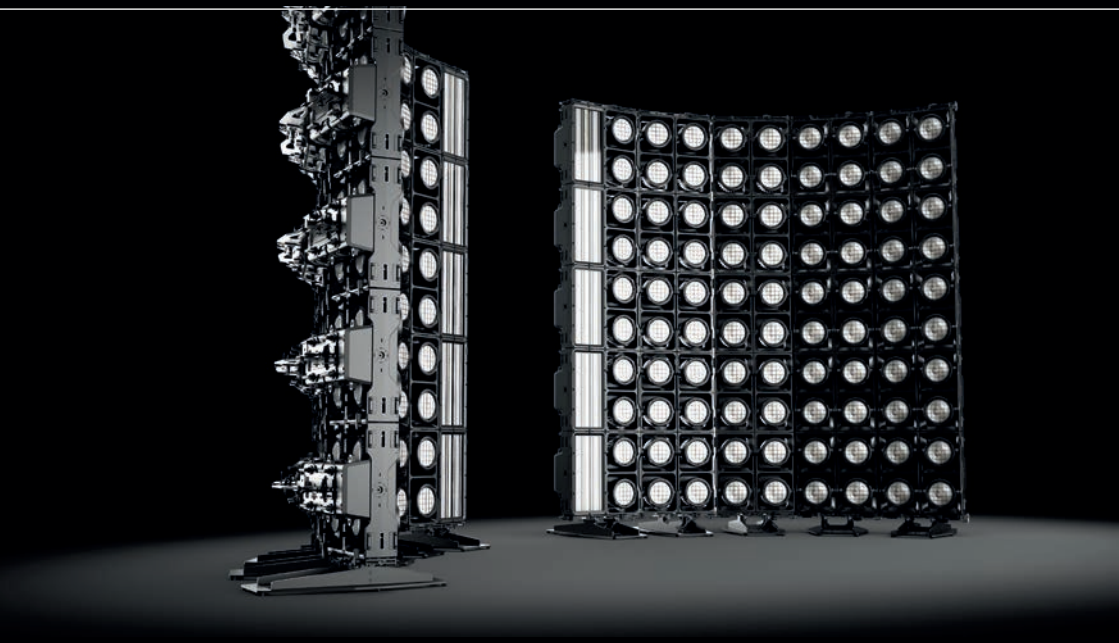
This accessory seamlessly changes the way you perceive pixels, creating softer textures and enhanced depth.

CLUSTER Series / CLUSTER Line Array

FOR CLUSTER B2, B4, S2

Elevate your lighting design with the CLUSTER Line Array Set, expertly engineered to unlock the full potential of your CLUSTER fixtures by transforming them into a high-performance line array system, similar to a professional PA setup. This cutting-edge accessory provides exceptional flexibility and stability, accommodating up to 16 CLUSTER B4 units or 22 CLUSTER B2 or S2 fixtures for versatile lighting configurations.

Designed for precision and adaptability, the CLUSTER Line Array Set allows you to achieve unmatched accuracy in lighting direction, making it perfect for concerts, theatrical performances, and any event that demands dynamic, impactful lighting solutions.

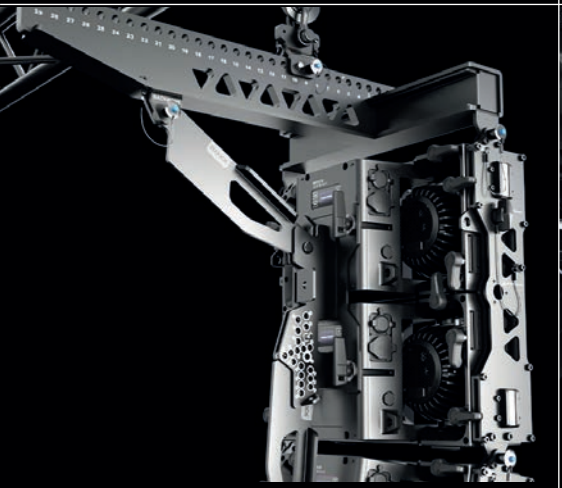


Side Brackets (Left & Right)

The CLUSTER Line Array Set includes left and right-side brackets, universally compatible with B4, B2, and S2 fixtures for a secure, reliable connection.

Backbone (Two Versions)

The backbone is the system's core support, available in two models: Backbone 4 for a single B4 and Backbone 2+2 for two 2-Lites wether you are using B2+B2, S2+S2 or one of each.



Flybar

Designed for professional stage use, the flybar offers secure mounting for lighting fixtures with a 7/16" shackle for quick, safe installation.

Floor Bracket

The floor bracket ensures a stable, secure foundation for ground-based horizontal placement of CLUSTER units.

The NEO series from ROXX sets a new standard for professional LED lighting with its exceptional performance, advanced technology, and robust design. Both NEO and NEO fx are equipped with 24 x 40W RGBL LEDs, delivering brilliant and precise illumination. Their exceptional color mixing and brightness ensure stunning visuals in any setting, from concerts and events to architectural applications.

With a CRI and TLCI of up to 85, the NEO series guarantees outstanding color accuracy, meeting the highest demands of broadcast and live performance environments. Designed to withstand the toughest conditions, the NEO series boasts an IP65 rating, making it ideal for both indoor and outdoor use. Its durable construction ensures long-lasting reliability in challenging environments. The NEO series features integrated CRMX transceivers and Bluetooth modules, allowing for seamless wireless DMX control. The fixtures can also be managed via the intuitive ROXX.APP, streamlining setup and operation. Both models are compatible with the ROXX NFC app, enabling fast and efficient device configuration through NFC-capable iOS or Android devices. This feature ensures quick setup and simplifies fixture management. With versatile control modes, pixel-mapping capabilities, and effects engines, the NEO series empowers designers to create captivating and unique lighting effects tailored to their vision.

User-friendly 2“ TFT display

The user-friendly 2” TFT display, complemented by backlighted buttons, provides direct access to dimmer, CCT, gels, app control and CRMX functions, simplifying operation for users of all levels.
In the floor application, the display is angled upwards for particularly user-friendly handling.

Near Field Communication (NFC)

Experience hassle-free addressing and configuration with our integrated Near Field Communication (NFC), even when fixture power is not available. This innovative feature revolutionizes your daily work processes, making light setup faster, easier, and more satisfying than ever before.

- Both models are equipped with 24 x 40W RGBL LEDs, delivering exceptional brightness suitable for various lighting scenarios
- With an IP65 rating, both fixtures are suitable for indoor and outdoor use, providing durability in diverse environments
- CRI and TLCI of up to 85 across the white spectrum, ensure accurate color reproduction for professional use
- They are compatible with the ROXX NFC app, enabling efficient device management and configuration directly from NFC-capable iOS or Android devices
- The specially developed copper heatpipe cooling system guarantees stable luminous intensity even at high ambient temperatures
- Linear CTC control from 2000K – 10.000K
- Each fixture includes an integrated CRMX transceiver and Bluetooth module, allowing for seamless wireless DMX setup and control via the ROXX.APP
- 2” TFT display with backlighted buttons, and direct access for dimmer, CCT, gels, App control und CRMX functions
- Adjustable PWM frequencies up to 25kHz guarantee flicker-free camera operation

Integrated CRMX Transceiver

The integrated CRMX transceiver and Bluetooth module offer seamless wireless DMX setup according to industry standards, along with direct control via the intuitive ROXX.APP, streamlining your workflow and enhancing efficiency.

NEO

ILLUMINATE YOUR WORLD

Illuminate your world with NEO, a cutting-edge lighting fixture that combines unparalleled performance with versatility and convenience. Crafted with precision and built to withstand the elements, NEO has a certified IP65 rating, making it suitable for both indoor and outdoor use. The specially developed 8° TIR lens enables high illuminance even at long distances and guarantees homogeneous color mixing.

- 24 x 40W RGBL LED´s create enormous 37,000lx @ 5m (5600K calibrated)
- The specially developed 8° TIR lens enables high illuminance even at long distances and guarantees homogeneous color mixing
- Optional magnetic circular and elliptical filters as well as a smoked clear filter
- CRI/Ra and TLCI of over 85 across the entire white color spectrum
- Four controllable segments and a plethora of integrated effects
- The specially developed copper heatpipe cooling system guarantees stable luminous intensity even at high ambient temperatures
- Linear CTC control from 2000K – 10.000K
- Integrated handles on head and yoke allow the device to be carried comfortably
- 16-bit dimming control for smooth, perfect fades
- Adjustable PWM frequencies up to 25kHz guarantee flicker-free camera operation
- Net weight (including Yoke): 15,4kg / 33,95 lbs
- Luminous flux: 27.225 lm
- Net dimensions: 545 x 340 x 210 mm // 21,46 x 13,39 x 8,27 inches
- Max power consumption: 988 W
- Tilt: 220°

Magnetic 8-way barndoor

The magnetic 8-way barndoor features a new clasp, allowing quick assembly and disassembly in mere seconds with two hands. It includes a locking option for security against unauthorized removal, and a tool-assisted lock for added safety.

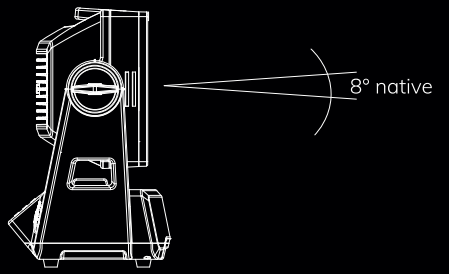
The 8-way barndoor of the NEO and its magnetic filters are stackable so they can be used together.

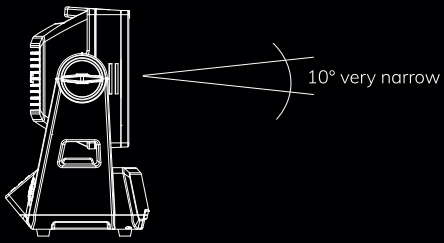
NEO

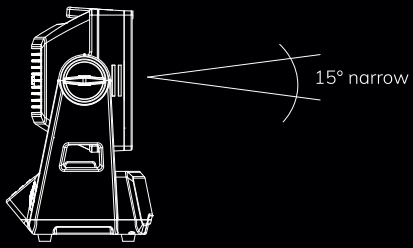
Magnetic filters & beam angles

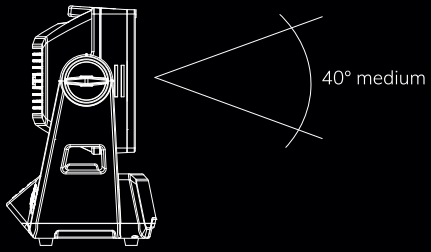
Optional magnetic filters enable various circular and elliptical beam angles, as well as a smoked clear filter for perfect camera applications.

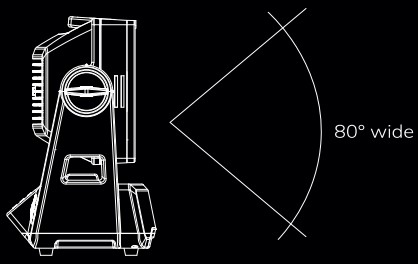
Smoked Clear Filter

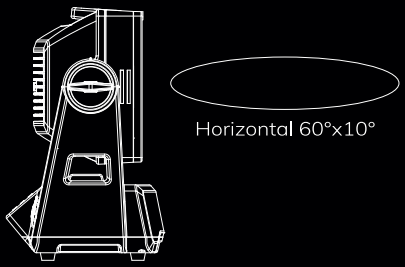


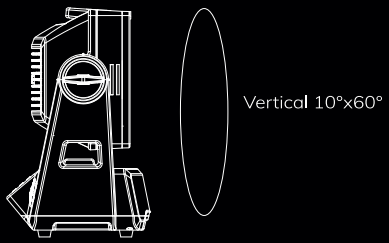












More accessories

Flightcases

Our durable, in-house-designed flight cases ensure top-quality storage and transport for up to four NEO lighting fixtures. With dedicated slots for filters and barndoors, they offer maximum protection and convenience.

Omega Bracket ST

Tool-free and fast mounting via ¼ turn fasteners. Central 13mm hole (1/2”) for easy connection to rigging clamps.

NEO fx

EXCEPTIONAL BRIGHTNESS
Luminous flux of 12,000lm (5600K) and illuminance of 60,000lx (RAW) / 57,000lx (5600K) @ 5m.

PATENTED SMART GLASS FILTER
Removable and magnetic, seamlessly switches between beam, wash, and unique graphic effects.

MASSIVE MOTORIZED ZOOM RANGE
4.5° – 70° beam angle with dual independent zoom levels (patent pending).

The NEO fx is a versatile LED wash and effect light built for demanding applications. Its IP65-rated housing, With 12,000lm (5600K) output and up to 60,000lx @ 5m, it excels indoors and outdoors.
The NEO fx features a dual-level zoom system, offering precise beam adjustments from a narrow 4.5° spotlight to a wide 70° wash. The first zoom level provides a sharp, concentrated beam for pinpoint accuracy, while the second expands to an even, wide wash for large areas.
When combined, the zoom levels enable smooth transitions and dynamic effects. Paired with the patented Smart Glass Filter, the NEO fx unlocks creative possibilities, blending beams, washes, and strobe effects.

- 24 x 40W RGBL LED´s create enormous 57,000lx @ 5m (5600K calibrated)
- Massive motorized zoom range of 4.5°–70° with dual independent, patent-pending zoom levels.
- The patented Smart Glass Filter, removable and magnetic, enables seamless transitions between beam, wash, and stunning graphic effects.
- CRI/Ra and TLCI of up to 85
- Motorized tilt assignment with fast, quiet 188° movement for versatile positioning and dynamic effects.
- Near Field Communication (NFC) enables convenient and quick setup of devices via our ROXX NFC App (iOS / Android)
- The specially developed copper heatpipe cooling system guarantees stable luminous intensity even at high ambient temperatures
- Linear CTC control from 2000K – 10.000K
- 2” TFT display with backlighted buttons, and direct access for dimmer, CCT, Gels, App control und CRMX functions
- Integrated handles on head and yoke allow the device to be carried comfortably
- Multiple mounting locations for creative rigging options & floor mount
- 16-bit dimming control for smooth, perfect fades
- Adjustable PWM frequencies up to 25kHz guarantee flicker-free camera operation
- Net weight (including Smart Glass Filter): 24,8kg / 54,7 lbs

NEO fx

Single Pixel Control

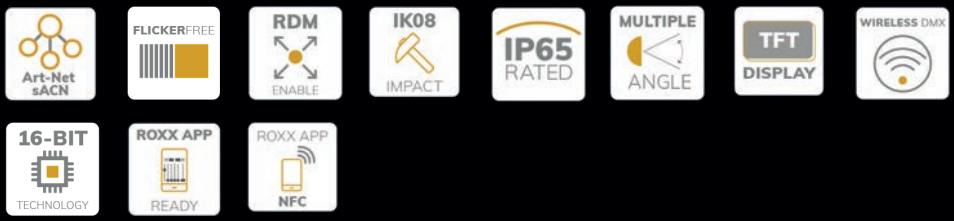
Enjoy precise lighting control with single pixel control to enable impressive graphic and light curtain effects. The fixtures dual-input mode allows control to be split into basic and pixel functions for enhanced flexibility.

Tilt Locking System

The Tilt Locking System ensures secure positioning by mechanically locking the fixture's head. This prevents unauthorized adjustments, maintaining precise alignment and protecting your setup.

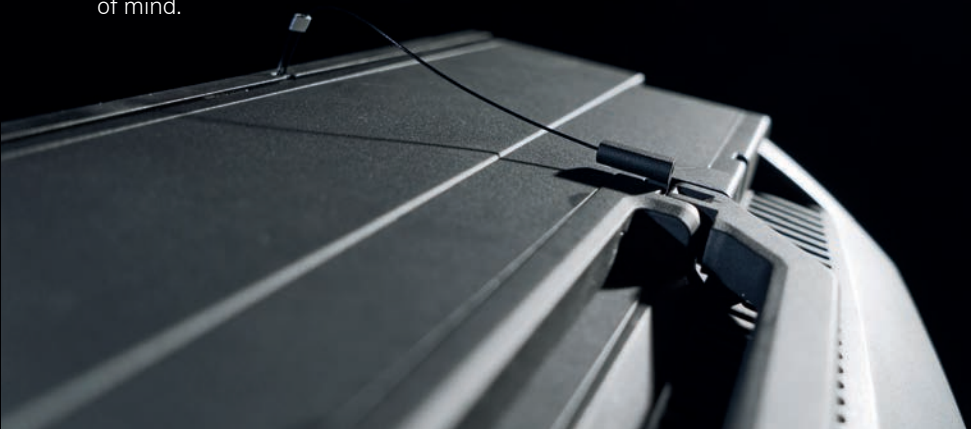
Smart Glas & Elliptical Filter available

Optional accessories include a magnetic Smart Glas Filter that is easily removable and seamlessly switches between beam, wash, and unique graphic effects. Another optional accessory is an elliptical holographic filter for precise beam shaping.



Short safety option on handle

Our Short Safety Option adds an extra layer of security to your filters. Attached directly to the handle, it complements the standard magnetic fastening, ensuring the filter stays firmly in place—even in the most demanding environments. Double the safety for ultimate peace of mind.



INSTALLATION

Engineered for Excellence in Demanding Environments

Designed and meticulously engineered in Germany, the A.SHOW series, NEO i, and CLUSTER S2i represent the pinnacle of performance and durability. Each product undergoes rigorous testing to ensure resilience in the harshest conditions, offering unparalleled reliability for architectural and installation applications.

Whether illuminating the grandeur of a cruise ship, enhancing the atmosphere of entertainment parks, providing lighting for industrial facilities, or adding artistic brilliance to architectural installations in churches and museums, these solutions deliver unmatched reliability and versatility. They are tailored to withstand environmental challenges, from extreme weather to industrial settings, while maintaining peak performance over time.

Marburg by Night, 2021
A.SHOW TW+

- Certified with an IP66 rating, ensuring protection against water and dust ingress for outdoor and harsh environments.
- Designed to withstand prolonged exposure to sunlight without material degradation.
- Coated with industry-leading C5-H or C5-M finishes, suitable for industrial and maritime conditions.
- High mechanical resilience with IK08 or IK09 impact resistance ratings.
- A 5-year warranty underscores the reliability and superior engineering of our products.
- Wide operating temperature ranges, ensuring consistent performance even in extreme climates
- Versatile mounting possibilities, including ceiling, floor, or suspension configurations, to fit diverse project needs

A.SHOW

Installation Version

For protection against environmental influences over a long period of time, the ROXX® A.SHOW series is IP66 certified and has an additional C5-M corrosion protection for coastal and offshore areas, providing that crucial extra for a wider range of applications. For comfortable and individual installation of the lighting fixtures, the external connections for power supply as well as the DMX inputs/outputs are designed as cable bushings with PG glands and Phoenix connection blocks.

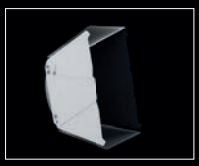
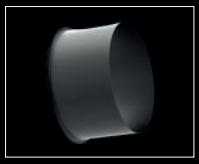
A.SHOW

Safety Free Accessory Holder
A.SHOW
Is only placed on the luminaire when needed and otherwise is concealed in the case.



Safety Free Barndoor
A.SHOW
A 360° rotatable 8-bladed barndoor is available for optimal beam control.

Safety Free Honeycomb
A.SHOW
A honeycomb filter is available to limit stray light and lateral reflections.



Safety Free Full Anti-Glare Shield
A.SHOW
Prohibits the direct view of the LED and thus reduces glare and stray light to a minimum

Lenses
A.SHOW
Circular and elliptical lenses. The 360° slot rotation also allows the elliptical lenses to be aligned continuously.

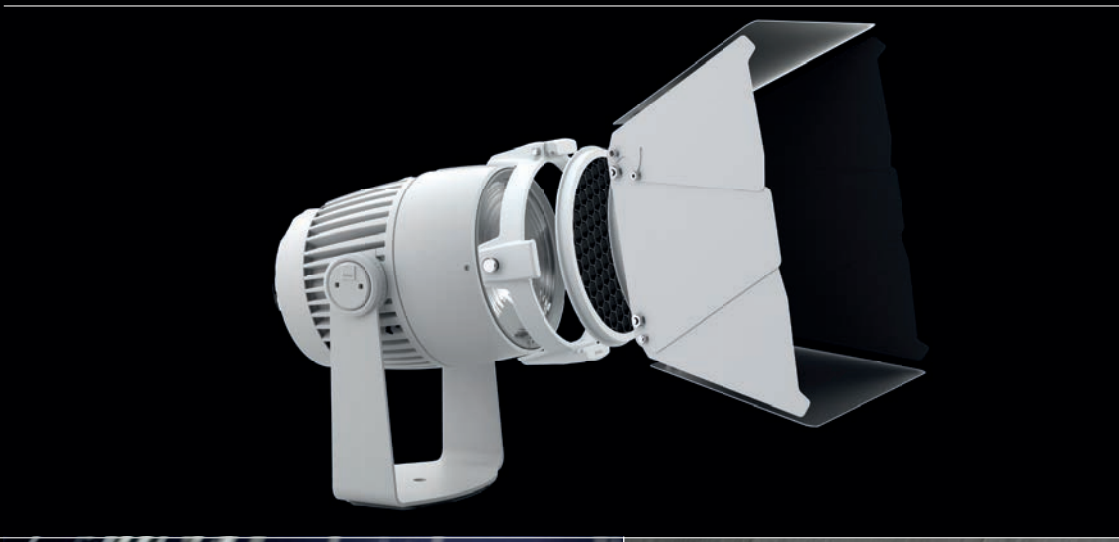
Suspended Luminaire
A.SHOW
The handle is removed and the mounting points are simply closed with the caps provided.

Pignose Screws
A.SHOW
For a more elegant look and additional protection against unintenional adjustment of inclination.

Cases

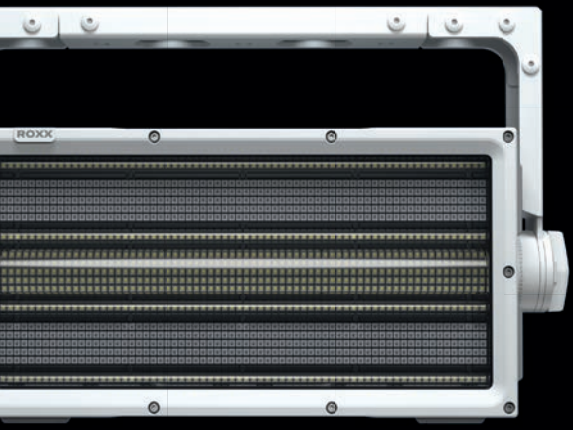
A.SHOW

Robust touring cases with optional stacking trays for lenses, accessory holders and barn-doors.



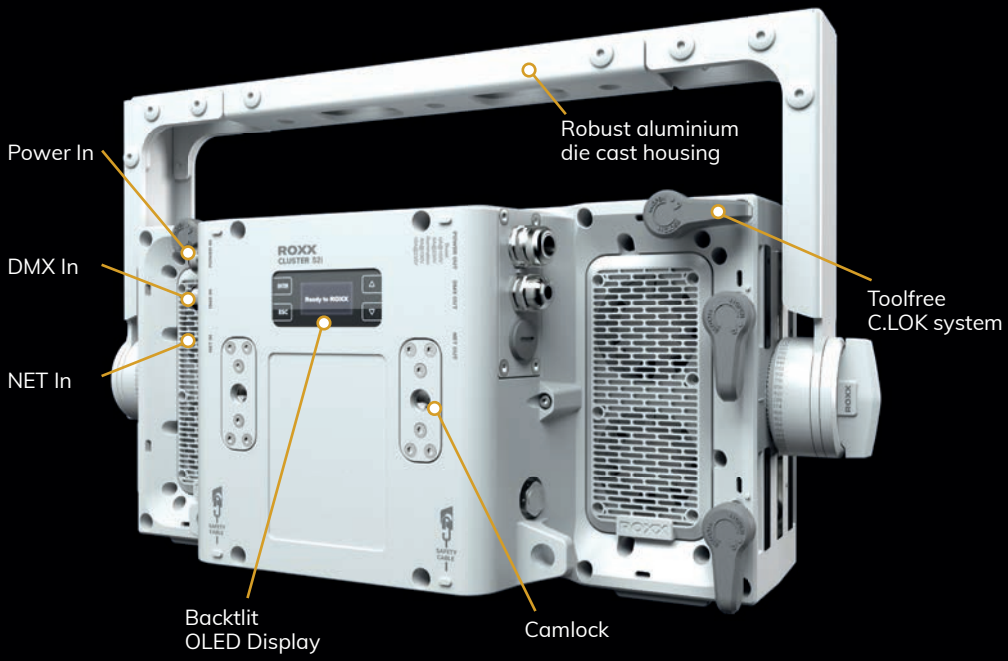
CLUSTER S2 i

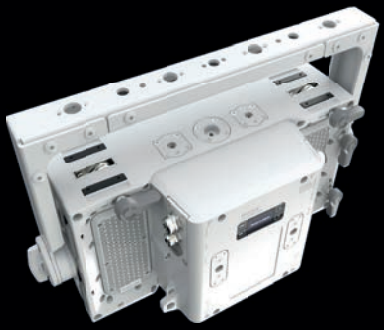
The CLUSTER S2 i is a versatile, high-power pixel-mappable strobe & washlight engineered to meet the demands of long-term installations. Its sleek, modern design, with a durable white finish (RAL 9010) and C5-H coating, ensures it blends seamlessly into any setting, while its robust construction allows it to withstand the rigors of outdoor environments. With a 5-year warranty, the CLUSTER S2 i is built for reliability and durability use in challenging conditions. Whether you are lighting up a stage, illuminating a building façade, or creating immersive environments, the CLUSTER S2 i delivers the power, flexibility, and durability you need to make an impact.



Omega Bracket STi

- High-power, pixel-mappable hybrid strobe / washlight
- 612 cool white LEDs (7000K) and 680 RGB LEDs deliever an impressive luminous flux of 57,750 lumens at full output (1200W).
- Full color mixing & tuneable white with high CRI.
- Four extra single Strobe lines create unique effects and give an extra boost on High-Power Strobe applications.
- Large number of build-in patterns
- Center Strobe mimics traditional look from Xenon-bulb Strobe.
- Combination of LEDs provides a wide range of lighting effects, from pure, crisp whites to rich, dynamic colors.



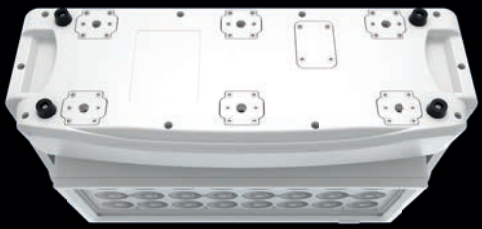


There are several mounting options – Camlock mounts on top and back enable the use of the new Omega Bracket STi, ensuring secure mounting and smooth integration into various setups, complete with M10 stainless steel screws and washers. Yokes can be attached to M12 mounting points on all sides, or the internal C-Lok system can be used for seamless interconnection. Pre-Link Magnets on top and side help to allign the fixtures and allows “one-handed” operation for secure locking.

The ROXX CLUSTER S2i also comes equipped with pre-installed elliptical filters, available in horizontal or vertical configurations. Designed specifically for long-term installations, these filters are securely fixed and cannot be easily changed or removed without tools, ensuring consistent and reliable performance over extended periods.

NEO i

The NEO i is purpose-built for challenging environments where durability meets performance. Designed with resilience in mind, the NEO i is IP66-certified, offering full protection against dust and powerful water jets, making it ideal for outdoor applications. Its IK09 impact resistance and 3G vibration rating provide unparalleled reliability, even in high-stress settings like architectural lighting, coastal areas, and industrial locations.



FURTHER
8° to 80° beam angle for high illuminance at any distance.

WHITER
CRI and TLCI over 85 across the white spectrum for accurate colors.

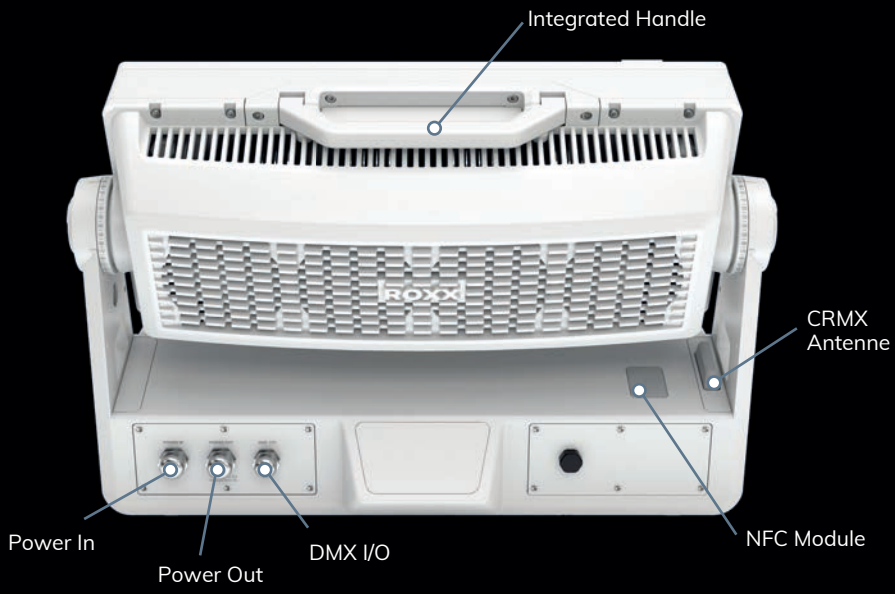
BRIGHTER
24 x 40W RGBL LEDs generate 37.000lx @ 5m, calibrated to 5.600K.

Full Glare Shield

Half Glare Shield

Internal Filterframe

Omega Bracket STi

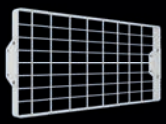


- Certified Durability: IP66-rated for dust and water resistance, IK09 impact protection, and 3G vibration rating.
- High-Quality Construction: Made from aluminum, nylon, and stainless steel, with all exterior screws in stainless steel to resist corrosion.
- Elegant, Weather-Resistant Finish: Coated in RAL 9010 white with a robust C5H finish for long-lasting performance in extreme environments
- NFC-Controlled Settings: A streamlined design without a display; all settings are managed through NFC and the ROXX app for ease and reliability.
- Omega Bracket STi Compatibility: Includes 2x M10 stainless steel screws and washers, providing secure mounting options for any setup.
- Internal Filter Installation: Optional filters are installed from the inside, adding extra protection without the need for magnetic attachments.

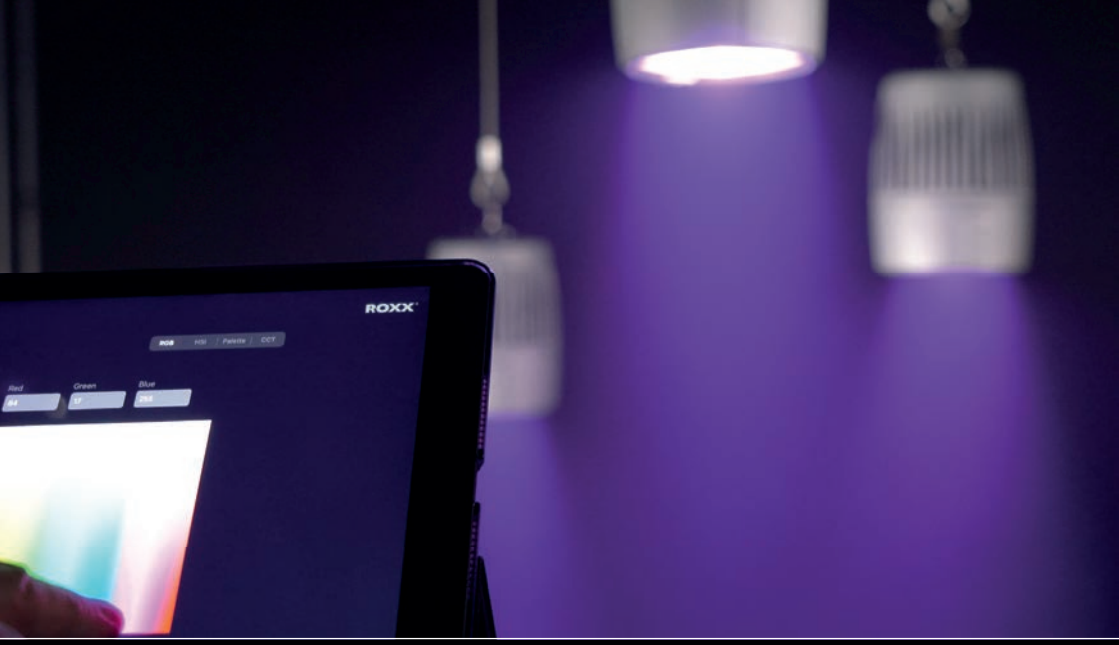
Wall Mount Floor

Wall Mount 90°

ROXX Grid

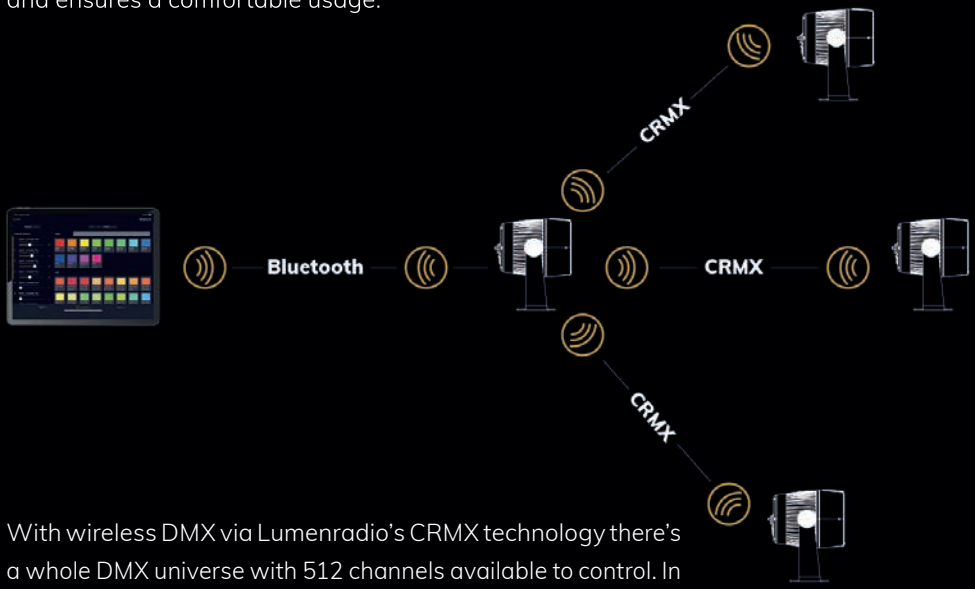


ROXX Guard



Simple connecting

ROXX.APP is super simple as your mobile device communicates directly via Bluetooth with the first ROXX® fixture in the system. No external hardware as a further communication interface is needed. A direct connection prevents complicated lighting networks and ensures a comfortable usage.



With wireless DMX via Lumenradio's CRMX technology there's a whole DMX universe with 512 channels available to control. In addition to ROXX® fixtures, devices from other manufacturers can also be controlled using integrated CRMX technology.

ROXX.APP

With quick and easy connecting, direct control of the ROXX® fixtures without any additional hardware and a compatibility with all iOS mobile device, you are provided with an innovative and high-performance lighting control system.
Program and edit your lightshows comfortably and in real time whether you are preparing exhibition stands, facade lighting or an industrial event. Not only battery-operated fixtures but LED pars and floodlights too are controllable from your iOS Smartphone or tablet with the ROXX.APP. Achieving maximum benefit through minimal effort.

Color Switching Modes

Various color modes are immediately accessible, such as RGB, HSI, linear CCT including predefined white light templates, green/magenta shift and a huge variety of preset LEE matched color filters. ROXX® color calibration ensures excellent white tones precisely on the black body curve and performs color matching across the entire range so that adjusted colors of ROXX® spotlights are reproduced precisely and homogeneously.

+ Quick and easy connecting	+ Customizable lighting scenes
+ Direct control of ROXX® fixtures without additional hardware	+ Easily adjustable brightness
+ Compatible with all iOS devices	+ Sharing
+ 1 universe / 512 DMX channels	+ Perfect overview
+ Color Switching Modes	

ROXX NFC APP

Seamless Control for Professional Lighting

The ROXX NFC App is designed for professionals in the entertainment lighting industry, offering cutting-edge control over ROXX fixtures equipped with NFC (Near Field Communication) technology. This app allows users to effortlessly manage and configure lighting devices directly from an iOS or Android device, provided it supports NFC, therefore streamlining workflows and increasing productivity.

With the ROXX NFC App, accessing and adjusting fixture settings has never been easier. Even when your devices are powered off, you can read and write all settings and information via the integrated NFC interface. This feature ensures you have full control over your equipment at all times, providing peace of mind and flexibility in any environment.

Read & Write Fixture Settings	**User Settings Management**
Access all fixture configurations and settings even when the device is powered off, thanks to the integrated NFC interface.	Easily create and manage custom user settings for different lighting scenarios tailored to your needs.
Multi-Patch Routine	**Firmware Updates (Coming Soon)**
Patch multiple fixtures in seconds, speeding up your setup process and reducing costs with fast workflows.	Keep your fixtures up to date with the latest firmware for peak performance and new features.

Whether you're a lighting designer, technician, or venue operator, the ROXX NFC App provides a powerful and intuitive solution for managing your lighting systems. With its easy-to-use interface, advanced features, and future-proof capabilities, controlling your fixtures is just a tap away – anytime, anywhere.
